

Practical work: Command Line interface

October 12, 2020

1 Introduction

The content of this practical work is presented by increasing order of difficulty. It is not mandatory to finish the subject. However, each student is expected to go up until the end of step 10.

2 Exercises with the command line interface

2.1 Initialization

To begin the exercise, perform the following tasks:

1. Using a Web Browser, download the archive `command_line_archive.zip`
2. Using your file manager, go to the directory where the file `command_line_archive.zip` is stored
3. Extract the archive (right click extract)
4. Open a terminal in this directory.

From this point all the manipulation have to be done using the terminal!

(You are allowed to use mouse and keyboard to browse the lecture slides and other documentation).

In the terminal, execute the program `'program_lv11.sh'` by typing the following command and pressing enter.

```
./program_lv11.sh
```

2.2 Next steps

Follow the instructions and solve as many exercises as possible !
